Doshier Wound Care Center Recognized for Clinical Excellence in Patient Satisfaction and Wound Healing Rates

For the fifth year in a row, the Wound Care Center at Doshier Memorial Hospital has been recognized as a Center of Distinction. The criteria for this recognition requires achieving or exceeding outstanding clinical and operational results, including patient satisfaction rates higher than 92 percent and a heal rate of 92 percent in less than 28 median days to heal.

The doctors, nurses and technicians on the Wound Care team are all specially trained in wound management and are invested in the most successful outcomes available for our patients. Brad Hilaman, MD, Doshier Hospital CEO and Medical Director of the Doshier Wound Care Center says, "The treatment that the Doshier Wound Care Center provides for our patients make a significant difference in their quality of life. Proper wound treatment not only allows patients to resume normal activity, it can prevent amputation or life threatening infection. The Doshier Wound Care team is humbled to have the opportunity to contribute to our community in this significant way."

Lynda Stanley, President of Doshier Memorial Hospital and Foundation says, "Our Wound Care team is highly invested in their patients and their outcomes. Recognition as a Center of Distinction is reflective of their commitment to clinical excellence."

Doshier's Wound Center is a member of the Healogics network of over 600 Wound Care Centers, and offers highly specialized wound care to patients suffering from diabetic ulcers, pressure ulcers, infections and other chronic wounds which have not healed in a reasonable amount of time. Treatments at the Center include hyperbaric oxygen therapy, which works by surrounding the patient with 100 percent oxygen under pressure to help progress the healing of the wound.

For more information, call 910-454-1192 or visit Dosher.org/Wound.
