Doshier Wound Care Center to Relocate Early December

Wound Center will relocate to a larger space to accommodate expanding patient case load, adjacent to Doshier Hospital.

SOUTHPORT—The Healogics® Wound Care Center at Doshier Memorial Hospital is set to reopen in a larger location, next to Doshier Hospital, in early December. The Doshier Wound Care Center, which provides highly specialized wound care to patients suffering from diabetic ulcers, pressure ulcers, infections, and other chronic wounds which have not healed in a reasonable amount of time, is in need of a larger space to accommodate the current patient load and demand for treatment.

The Wound Care Center will close after business hours on Thursday December 3rd and move to an office directly adjacent to Doshier Memorial Hospital at 904 North Howe Street, Pod B in Southport, and reopen Monday Morning December 7th to continue treating patients. The site for hyperbaric therapy will remain at its current location, inside Doshier Hospital.

The Doshier Wound Care Center opened in 2014 and has been recognized as a National Center of Distinction for the past four years for their exceptionally high heal rate and patient satisfaction scores. Treatments at the Center include hyperbaric oxygen therapy, which works by surrounding the patient with 100 percent oxygen under pressure to help progress the healing of the wound.

For more information on the Doshier Wound Care Center or the relocation, call 910-454-1192 or visit Doshier.org/Wound.

Doshers' award winning Wound Care team, recognized as a National Center of Distinction, is relocating on December 7th.
